

Pensato per progetti complessi di architettura, Fluid è un tappeto taftato a mano, realizzato con un blend di lana e nylon che lo rende adatto ad un largo spettro di possibili utilizzazioni, da sviluppi residenziali, a spazi commerciali, all'arredamento di interni per l'ospitalità.

L'aspetto tecnico dei filati è arricchito da una lavorazione manuale che permette di personalizzare le superfici con disegni ad intarsio e finiture bouclé e rasato che rende unico ogni singolo pezzo. Questa nuova forma di artigianalità ideata da Deanna Comellini, Direttore Creativo di G.T.DESIGN, è applicata al design di pattern a rilievo mantenendo una composizione elegante e sobria del tappeto.

Inoltre, la collezione Fluid permette la più ampia gamma di personalizzazioni su richiesta del cliente, dall'oversize (fino ad oltre 12 mt. di larghezza), alla possibilità di variare spessori, finiture e colori bespoke.

Conceived for complex architectural projects, Fluid is a hand-tufted rug made in a wool and nylon blend suitable for many environments, from residential developments, to commercial spaces, to interior design projects for the hospitality industry.

The high performance yarns are woven using a handmade technique that allows to customize the textures with inlay designs, and bouclé and cut pile finishes resulting in one-of-a-kind pieces. This new form of craftsmanship conceived by Deanna Comellini, G.T.DESIGN Creative Director, is applied to design in relief patterns while keeping an elegant and understated composition of the rug. In addition, the Fluid collection features a vast range of personalization by client request, including oversize rugs (more than 9mt. width), thickness variations, finishes and bespoke colors.

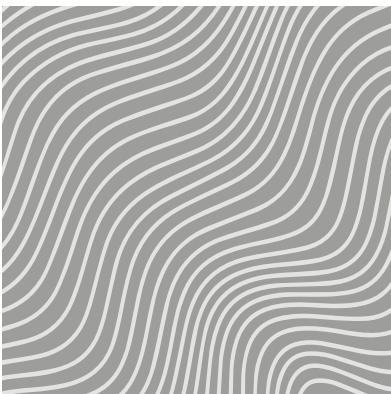

Material: wool and nylon  
Structure: hand tufted - hand carved  
Thickness: 6 mm (loop pile) / 10 mm (cut pile)  
Backing: action back / cotton backing  
Dimension: variations of +/- 3% are to be considered the norm  
Maintenance: daily with vacuum cleaner - periodic with shampoo  
Use: residential / medium traffic

Flame resistance: Bfl-S1 - ASTM E648 - ASTM 662 (on request)

bespoke	estimated delivery time	colours	dimensions / finishing
	8/10 weeks approx.	01 Carbone 10 Ghiaccio 11 Cemento 23 Sabbia	all widths (max 1200 cm / 39'4" ft) all lengths - matching border also in custom shapes and wall to wall custom color on demand
